G'morning Dave!

I know the lower Harbor CAD Cell ERDC effort is still under review, but do we want to begin getting ERDC going on the Upper harbor CAD cell effort?

In preparation for that work we will need to get them the proposed design information including its location, design, access, disposal methods, disposal equipment, site controls (such as sheet piles) and DMU material to be placed in it need to be provided to ERDC. Has this criteria been finalized?

Tx, Bob
